Medical Billing Services

Real Time RCM Reporting

A healthy practice needs an experienced support team with real-time visibility to all your financial details. FutureNet helps you stay on top of your complete financial picture with detailed billing and RCM reporting:

Accounts Receivable

Up-to-the-minute, detailed or summarized aged receivables information with 100% visibility of uncollected claims.

Revenue and Production

Allows you to analyze your delivered practice procedures by code for better insight into how you allocate your time.

Payments and Charges

Detailed or summarized list of payments received and charges submitted, helping you categorize payments and charges by multiple variables including location, physician, and/or insurance carriers and more.

Frequency of Procedure/Diagnosis

Examine your most common procedures, diagnosis codes, or other billable data recoded within your practice. You can customize this report by provider, location or date range.

Payment Reimbursements

Analyze your payment history by insurance carrier to help you determine who are or are not adhering to negotiated fee schedules. This report is especially useful when it is time to renegotiate contracts or fee schedules.

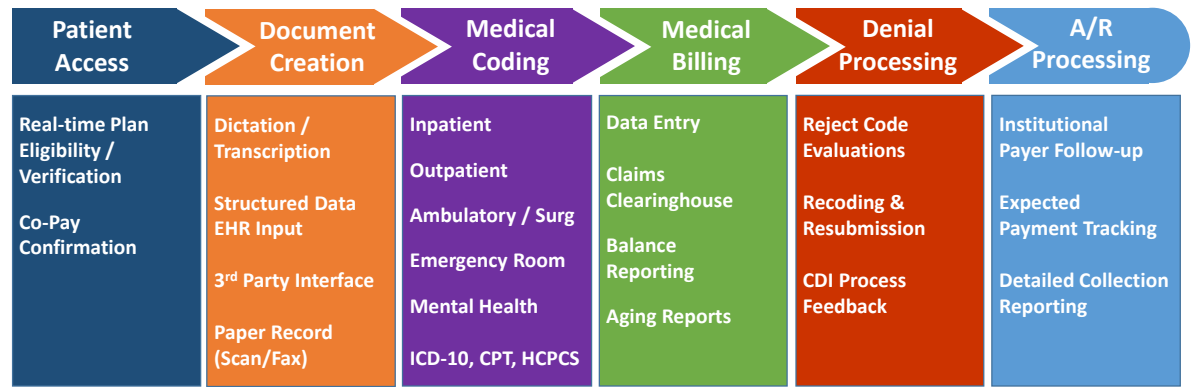

Denial Reports

Review claim denials by insurance carrier, helping you to identify gaps in documentation or other RCM workflow processes that impact reimbursements, in addition to any carrier issues.

Billing Services & Revenue Cycle Management

FutureNet can significantly improve your billing and collection results through real-time reporting, proven process experience, and a robust and customizable service delivery platform.

Unmatched End-to-End Integrated Service & Technology Offering Available as a Cafeteria Plan for Increased Productivity, Faster Payments, Lower Costs, & Enhanced Balance Tracking.

FutureNet understands that all medical practices are not the same, so we provide billing and RCM solutions that are custom tailored for your specific practice needs.

From personalized performance and demographic reports to insurance provider enrollment and analysis, our team at FutureNet provides a full range of billing and RCM services designed to ensure you are billing and collecting the maximum appropriate amounts for the services you've delivered.
